## FEDERAL LABORATORY CONSORTIUM FOR TECHNOLOGY TRANSFER

**FLC** *advancing federal research and technology*

The Federal Laboratory Consortium for Technology Transfer (FLC) and the National Technical Information Service (NTIS) continuously collaborate on the process of Federal Technology Transfer.

The FLC is the nationwide network of federal laboratories that provides the forum to develop strategies and opportunities for linking laboratory mission technologies and expertise with the marketplace. The FLC consists of more than 250 federal laboratories.

As an agency of the U.S. Department of Commerce, the NTIS mission is to provide for the acquisition, archiving and dissemination of technological, scientific, and engineering information. Much of this permanent repository of information is the result of research conducted by federal laboratories that are members of the FLC. The collaborative effort of the FLC and NTIS ensures the perpetual availability of this vital research to American businesses and industries.

## *Attention NTRL V3.0 Subscribers –*

Announcing the NTRL V3.0 Subscriber Survey 2012. In our ongoing efforts to improve and enhance the NTRL V3.0, from the NTRL home page we have launched a brief survey invitation to gather feedback from our subscriber community. The survey consists of 5 questions and will take approximately 3 minutes to complete. We encourage the participation of all NTRL V3.0 subscribers and their users so that they may play an active role with the future development of the NTRL.

### Subject Category Codes/Classification

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from three to five, although there are some reports with more.

NATIONAL TECHNICAL REPORTS LIBRARY

***The National Technical Reports Library (NTRL)* enhances accessibility to the NTIS technical reports collection. It provides access to:**

- Bibliographic records of more than 2,000,000 technical reports
- Downloadable full text of 700,000 of these reports in PDF format

Subscription rates are based on institutional FTE levels.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 700k full-text documents in PDF format that are directly linked to that bibliographic database.
