

Only Meridian supports **SCORM** fully —

from development to delivery.

SCORM Solutions

Meridian has been an innovator on the forefront of the Shareable Content Object Reference Model (SCORM) specification ever since its January 2000 introduction. Meridian was the first enterprise LMS to receive SCORM certification, and the first-ever desktop LMS certified for SCORM 2004. Meridian is one of, if not the only company, that offers both a SCORM 2004 certified LMS and a SCORM 2004 certified offline LMS application, ensuring direct plug-and-play integration with the widest possible selection of learning materials to support your business goals.

Implementing SCORM can be challenging, but Meridian offers a range of tools that let you manage any SCORM-conformant content easily and deliver that content to anyone, anywhere.

Only Meridian offers the exclusive Meridian Anywhere desktop application, which uses SCORM to bring the benefits of online learning beyond the Internet. Now, learners with limited or restricted Web access can take SCORM conformant courseware offline and upload or import progress data to the Meridian Global LMS or any other LMS, with full tracking and reporting functionality. Meridian Anywhere supports single- or multi-user implementations, such as a training kiosk.

Content Administrators can use Meridian's **SCORM Bulk Importer** to load several SCORM courses at once. Copy courses to the server, and the SCORM Bulk Importer scans the specified location for all course manifests and imports them, creating

the new courses in Meridian Global LMS. From there, administrators can complete course setup for each course as needed.

Meridian also has extensive experience in **custom courseware development**, with over 1,500 hours of SCORM-conformant courseware and over 2,500 total courseware hours created.

SCORM and the SCORM logo are certification marks of Concurrent Technologies Corporation of Johnstown, Pennsylvania. The SCORM 2004 Compliant logo indicates that Meridian has been independently tested and certified by an ADL-designated certification organization to comply with SCORM 2004. Successful test results for a product constitute AS IS compliance with SCORM 2004 using the designated tests. Compliance evaluation using SCORM 2004 tests developed by ADL or others does not constitute or imply endorsement or assurance by ADL or others of product utility, quality, or reliability in use or technical accuracy of content.
