

u360™ Enterprise Edition

RWD's Integrated Learning Solution

RWD Technologies understands that your customer satisfaction and bottom line depend on using the most comprehensive solution to improve enterprise performance. Today's global enterprises have workforces with diverse learning needs, channel partners to support, products and services to sell, corporate procedures to follow and new hires to train. How is it possible to stay ahead of the competition, do more with less, keep customers happy, and give your workforce and key stakeholders the knowledge they need on demand?

RWD Technologies can help. We have a proven track record of bringing people and technology together with innovative products and services that improve human and operational performance. u360 is our comprehensive integrated learning solution that drives business performance improvement with effective delivery of blended training. u360 makes the process of creating, managing, and delivering knowledge transparent across the enterprise.

Right now you may be struggling with multiple and antiquated systems to deliver various forms of learning and no ability to scale implementation according to your specific training needs. Perhaps you are considering alternatives for your increasingly mobile and diverse salesforce. Whatever your challenge, u360 has the versatility and the flexibility to seamlessly integrate legacy systems so implementation can be phased across the enterprise.

Featured Benefits:

Reduce Manual Labor Time

- Streamlines content creation and delivery from multiple sources
- Dynamic delivery of content to various outputs

Complete Scalable End-to-End Solution

- Components when needed
- Easily configurable systematic approach to implementation process
- Integrates legacy systems
- Rapid deployment

Course Catalog

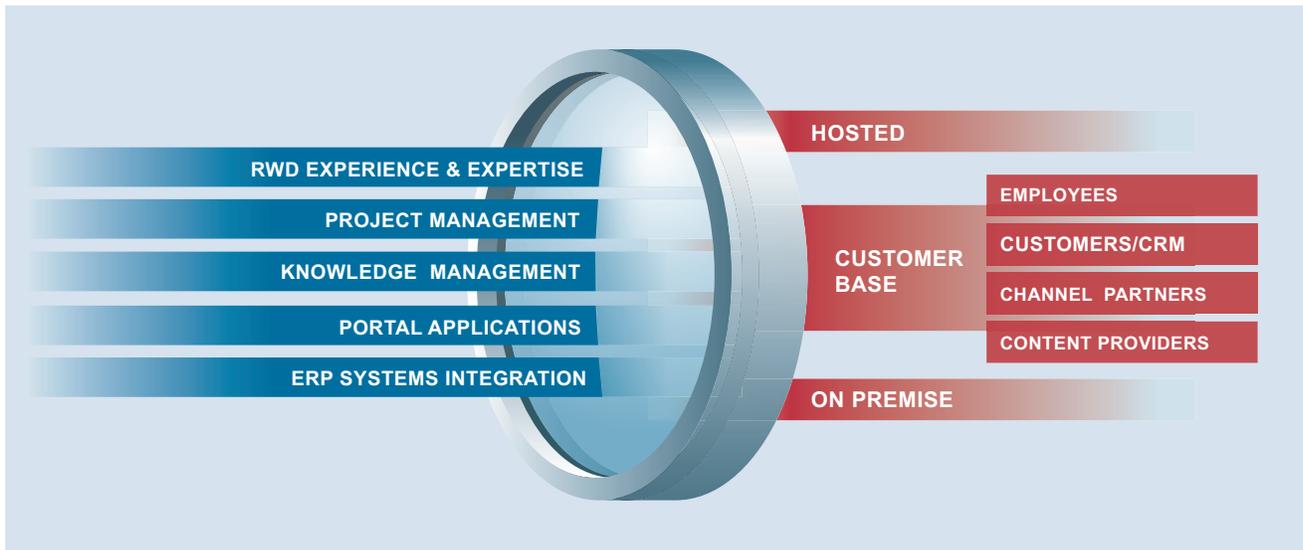

- Preconfigured
- Industry-specific packages
- Simulations
- Customized

Enhance Customer Service

- Internal customers have better analytic tools for enterprise knowledge management
- External customers get on demand delivery of the relevant content in their preferred format

Make Channels Accountable

- Integrates with other enterprise systems
- Assess channel competencies

RWD will have your enterprise running u360 in days, not months.

Whether you are delivering knowledge to 1 person or to 100,000 people, u360 is engineered to be flexible using your content, our content, or a combination of both.

- Full-featured online administrative processes
- Manage courseware catalogs and scheduling of courses
- Deliver standardized content (SCORM & AICC)
- eLearning content and delivery
- Testing, assessments, and psychometrics
- Track individual attendance and course performance
- Track commerce transactions
- Internationalized
- Prepackaged content is already loaded to expedite the learning process

About u360™

RWD provides solutions covering the full spectrum of learning needs. We can help you develop your learning strategy, build your classroom and Web-based training, and deliver them to your end users. u360 is a complete, end-to-end solution that drives business performance by optimizing the creation, management, and delivery of enterprise knowledge. Its component-based architecture allows you to purchase and apply modules as needed, and it integrates seamlessly with legacy systems, preserving your original investment. Whether you are a content developer, subject-matter expert, manager, or training administrator, u360 is designed to help you improve performance by capitalizing on the latest advances in learning. The u360 solution accommodates critical talent management, performance management, and competency-based learning. u360 is also compatible with such new technologies as podcasting, blogs, and wikis, helping you adjust your delivery methods to the styles of your learners.
