**FEDERAL LABORATORY CONSORTIUM  
FOR TECHNOLOGY TRANSFER****FLC** *advancing federal  
research and technology*

The Federal Laboratory Consortium for Technology Transfer (FLC) and the National Technical Information Service (NTIS) continuously collaborate on the process of Federal Technology Transfer.

The FLC is the nationwide network of federal laboratories that provides the forum to develop strategies and opportunities for linking laboratory mission technologies and expertise with the marketplace. The FLC consists of more than 250 federal laboratories.

As an agency of the U.S. Department of Commerce, the NTIS mission is to provide for the acquisition, archiving and dissemination of technological, scientific, and engineering information. Much of this permanent repository of information is the result of research conducted by federal laboratories that are members of the FLC. The collaborative effort of the FLC and NTIS ensures the perpetual availability of this vital research to American businesses and industries.

## NTRL INCREASES ACCESS TO FEDERAL S&T REPORTS

NTIS has launched greater access to federally funded science & technology information and reports. Starting in October 2014, U.S. citizens have free access to all electronically-available documents in the NTIS collection.

Currently there are more than 850,000 documents digitized for free public access. For the first time, Individuals have the option to subscribe to the NTRL in order to benefit from the Premium features of the database, such as advanced search, more free downloads, and digitization-on-demand (NTRL Premium Institutional).

Please feel free to contact me if you have any questions.

## CENDI (Commerce, Energy, NASA, Defense Information Managers Group)

CENDI (Commerce, Energy, NASA, Defense Information Managers Group) is an interagency group of senior Scientific and Technical Information (STI) managers from 14 United States federal agencies.

CENDI traces its roots to the Committee on Scientific and Technical Information (COSATI) of the Federal Council on Science and Technology. COSATI was established in the early 1960s to coordinate the management of the results from the U.S. government's increasing commitment to scientific research and technology development. The scientific and technical information (STI) managers of the government's major research and development (R&D) agencies worked within COSATI to standardize guidelines for cataloging and indexing technical reports. COSATI ceased formal operations in the early 1970s.

To continue the cooperation begun under COSATI, managers of agency STI programs from Commerce (National Technical Information Service), Energy (Office of Scientific and Technical Information), NASA (HQ/STI Division), and Defense (Defense Technical Information Center) began meeting periodically to discuss common topics and stimulate more effective cooperation.

In 1985, a Memorandum of Understanding was signed by the four charter agencies and CENDI was established. From this small core of STI managers, CENDI has grown to its current membership, which represents the major science agencies, the national libraries, and agencies involved in the dissemination and long-term management of scientific and technical information.

## Public Access Plans of U.S. Federal Agencies

*Additional Public Access Plans will be posted as agencies release them.*

In a memo released by the Office of Science and Technology Policy (OSTP) on February 22, 2013, each Federal agency with over \$100 million in annual conduct of research and development expenditures was directed to develop a plan to support increased public access to the results of research funded by the Federal Government. This included any results published in peer-reviewed scholarly publications that are based on research that directly arises from Federal funds, as defined in relevant OMB circulars (e.g., A-21 and A-11).

The full memo can be viewed at <https://www2.icsu-wds.org/files/ostp-public-access-memo-2013.pdf>.

Some agencies not subject to the OSTP memo are voluntarily developing Public Access Plans and are included below.

**Fisheries of the United States 2013: Current Fishery Statistics No. 2013**  
 INational Marine Fisheries Service, Silver Spring, MD. Fisheries Statistics  
 Div.

This publication is the annual National Marine Fisheries Service (NMFS) yearbook of fishery statistics for the United States. The report provides data on U.S. recreational catch and commercial fisheries landings and value. In addition, data are reported on the U.S. fishery processing industry, imports and exports of fishery-related products, and domestic supply and per capita consumption of fishery products.

In 2012, estimated freshwater plus marine U.S. aquaculture production was 594 million pounds with a value of \$1.23 billion, a decrease of 17 million pounds (2.8%) in volume and 103 million (7.7%) in value from 2011. Atlantic salmon was the leading species for marine finfish aquaculture, with 42.5 million pounds produced (up 3.8%) valued at \$77.1 million (down 25.9%).

U.S. consumers spent an estimated \$86.5 billion for fishery products in 2013. The 2013 total includes \$57.9 billion in expenditures at food service establishments (restaurants, carry-outs, caterers, etc.); \$28.1 billion in retail sales for home consumption; and \$478 million for industrial fish products. By producing and marketing a variety of fishery products for domestic and foreign markets, the commercial marine fishing industry contributed \$43.6 billion (in value added) to the U.S. Gross National Product.

**The National Technical Reports Library (NTRL) enhances accessibility to the NTIS technical reports collection. It provides access to:**

- Bibliographic records of more than 2,500,000 technical reports
- Downloadable full text of 850,000 of these reports in PDF format

Subscription rates are based on the number of IP's.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 800k full-text documents in PDF format that are directly linked to that bibliographic database.

**Just Revised: the NTIS Database Search Guide**

Gain an in-depth understanding of the NTIS database structure with this new guide:

- Comprehensive list of NTIS Categories
- Helpful information and search hints
- Reference Guide to online commercial services and the NTRL
- Great Reference Manual & Teaching Tool

**Subject Category Codes/Classification**

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from three to five, although there are some reports with more.

Any of the technical reports listed in this newsletter can be ordered directly from the National Technical Information Service, simply click on the title to go to the product detail page on NTIS.GOV.

If your organization is a subscriber to the National Technical Reports Library, most of the reports listed can be downloaded free there. For information on how to subscribe to NTRL, go to <http://www.ntis.gov/products/ntrl/>.

## Title Index - For NTRL Users

The following is a list of the titles included in this month's issue, without links to the NTIS Web site. The list is in alphabetical order by title.

NTIS Number	Category	Title
PB2013108740	47	Alaska Marine Mammal Stock Assessments, 2012.
PB2015100575	47	Alaska Marine Mammal Stock Assessments, 2013.
PB2014103330	48	Assessment of Potential Mining Impacts on Salmon Ecosystems of Bristol Bay, Alaska. Executive Summary.
PB2014103331	48	Assessment of Potential Mining Impacts on Salmon Ecosystems of Bristol Bay, Alaska. Volume 1. Main Report.
PB20141033263	48	Assessment of Potential Mining Impacts on Salmon Ecosystems of Bristol Bay, Alaska. Volume 2. Appendices A-D.
PB2014103332	48	Assessment of Potential Mining Impacts on Salmon Ecosystems of Bristol Bay, Alaska. Volume 3. Appendices E-J.
ADA597457	57	Burrowing by Sailfin Catfish ( <i>Pterygoplichthys</i> sp.): A Potential Cause of Erosion in Disturbed Environments
PB2013110851	47	Cape Fear River Basin Action Plan for Migratory Fish.
ADA595225	55	Changes in the Arctic: Background and Issues for Congress.
PB2013109857	47	Chignik Management Area Commercial Salmon Fishery Harvest Strategy, 2013.
PB2014106318	98	Commercial Fishing Morbidity and Mortality U.S. Distant Water Tuna Fleet 2006-2012.
PB2014106513	98	Documentation of a Relational Database for the California Recreational Fisheries Survey Onboard Observer Sampling Program, 1999-2011.
PB2013104705	47	Eastern Bering Sea Continental Shelf Bottom Trawl Survey (2012): Results for Commercial Crab Species.
PB2015101255	47	Eastern Bering Sea Continental Shelf Bottom Trawl Survey, 2014: Results for Commercial Crab Species.
PB2014101866	98	Estimation of Bycatch in the Unobserved Pacific Halibut Fishery off Alaska.
PB2013105915	98	Fatal and Nonfatal Injuries Involving Fishing Vessel Winches--Southern Shrimp Fleet, United States, 2000-2011. Morbidity and Mortality Weekly Report Volume 62 Number 9.
PB2014105511	70	Fisheries of the United States, 2012.
PB2015101650	70	Fisheries of the United States, 2013.
ADA606028	98	Fisheries Resource Utilization of an Estuarine Borrow Pit in Mobile, Bay, Alabama.
PB2015100681	48	Great Lakes Restoration: Success Through Science. U.S. Geological Survey Accomplishments 2010 Through 2013.
PB2015100578	98	Involving Fishing Communities in Data Collection: A Summary and Description of the Alaska Community Survey, 2010.
PB2015102176	98	Journal of the Fisheries Society of Taiwan, Volume 40, No. 4, December 2013.
PB2013108855	47	National Ocean Policy Implementation Plan.
PB2014103374	47	Natural History of the Sea Lamprey, ' <i>Petromyzon marinus</i> ' in Michigan. Special Scientific Report Fisheries No. 55.
PB2014104030	47	North Pacific Marine Mammal Bycatch Estimation Methodology and Results, 2007-2011.
ADA585468	57	Planning Guide for Fish Passage at Pittsburgh District Dams.
PB2014104959	98	Post-Release Behavior and Movement Patterns of Chinook Salmon ( <i>Oncorhynchus tshawytscha</i> ) and Coho Salmon ( <i>Oncorhynchus kisutch</i> ) After Capture Using Alternative Commercial Fishing Gear, Lower Columbia River, Washington and Oregon, 2013.
PB2013109576	91	Regional Impact Evaluation: An Initial Assessment of the Economic Impacts of Sandy on New Jersey and New York Commercial and Recreational Fishing Sectors.
PB2015100576	47	Results of the 2012 Chukchi Sea Bottom Trawl Survey of Bottomfishes, Crabs, and Other Demersal Macrofauna.
PB2014100750	98	Results of the 2012 Eastern Bering Sea Upper Continental Slope Survey of Groundfishes and Invertebrate Resources.
PB2014101253	47	Terms of Reference & Advisory Report of the American Eel Stock Assessment Peer Review.
